Investment Philosophy & Approach

Geode views equity index portfolio management as an exercise in risk mitigation.

Source of Risk	Geode's Approach to Mitigating Risk
Benchmark Methodology	Flexible portfolio construction strategies for various benchmark providers
Changes in Benchmark	Determine low impact trade strategy to effect change
Cash Flows	Monitor activity and assess trends to best estimate & invest fully on NAV date
Corporate Actions	Weigh risk/reward of election alternatives versus benchmark methodology
Security Misweights	Choose tailored construction methodology for each portfolio/benchmark
Current Events	Monitor economic releases, corporate actions and current events

Efficient Trade Implementation

- Structured trade-implementation process
- Maximize implementation efficiencies

- Smart order handling maximizes liquidity opportunities
- Economics of sale minimizes explicit transaction costs
- Compliance & risk management fully integrated into the process

Result: minimal market impact and low transaction costs

Geode Advantages

EXPERIENCE Geode recognizes that the most sophisticated systematic processes benefit from applied fundamental insights. Our investment professionals are experienced in each of their disciplines, and work collaboratively to share expertise for the enrichment of our investment processes.

RISK MANAGEMENT Client portfolios are constructed in a disciplined manner with a focus on managing and controlling risk-exposures in an effort to produce optimal risk-adjusted returns.

INSTITUTIONAL INFRASTRUCTURE A state-of-the-art trading platform and robust operational infrastructure create efficiencies and help to provide scale across investment disciplines.

RESEARCH Dedicated to advanced techniques for uncovering alpha sources, Geode's research team is constantly looking for new and repeatable methods of transforming idea flow into applicable investment processes. This centralized research approach helps to ensure that the best ideas are efficiently implemented across investment strategies.

DISCLOSURES

Investment in a Geode fund is suitable only for sophisticated investors for whom an investment in such fund does not constitute a complete investment program and who fully understand and are willing to assume the risks involved in a Geode fund. You are urged to review the full investment history of each strategy described herein in order to obtain a complete understanding of methods used to calculate the charts and tables contained in this report. Such information can be obtained by contacting us. Also, the investments relating to the strategies described herein were not made with a view towards accommodating your specific needs, financial concerns or investment objectives. References to market or composite indices, benchmarks or other measures of relative market performance over a specified period of time (each, an "index") are provided for your information only. Reference to this index does not imply that the portfolio will achieve returns, volatility or other results similar to the index. The composition of the index may not reflect the manner in which a portfolio is constructed in relation to expected or achieved returns, portfolio guidelines, restrictions, sectors, correlations, concentrations, volatility or tracking error targets, all of which are subject to change over time. Portfolio characteristics, including specific holdings, contributors to performance, and country, sector and industry exposure, are as of the date indicated and are subject to change without notice. Information is reported on a delayed basis (as of date indicated) to protect the confidentiality of this information, and the reported information may differ significantly from current information. More current information is available on a confidential basis. Portfolio characteristics illustrate the application of Geode's investment style only and should not be considered a recommendation by Geode. References to investment objectives, target returns or other goals Geode seeks to achieve in managing a fund or account are aspirational only and should not be considered a guarantee that such results will be achieved. Any portfolio risk management processes discussed include an effort to monitor and manage risk, but should not be confused with and do not imply low risk. There is no guarantee that a particular portfolio will meet its investment objective. Risk management is no guarantee of future performance. Opinions expressed are current opinions as of the date appearing in this material only.
